

Business Email as it should be

solving the most critical issues,
in a cost-efficient way.

What is unique:

UPTIME

Ensured via [DUAL ACTIVE](#) servers

Your email is always on, as it is hosted on two private servers, in dual active mode, perfectly synchronized and 24/7 monitored. This means, that in case of an outage, you will continue enjoying a fully functional email, from the other active server. We can also built for you, your own hybrid servers.

BUSINESS CONTINUITY

Ensured through your own [DAILY BACKUP](#) copy

Every day, we deliver a server-side backup of your cloud emails to a location you trust (on premise, e.g. NAS, or another cloud), in a structured and interoperable format (Maildir). Ideal for [Archiving](#) and [e-Discovery](#), it ensures your [Data Portability](#) (GDPR Art. 20) and Business Continuity.

DATA PRIVACY

Protected at maximum, [BY DESIGN](#) and [BY DEFALUT](#)

1. Transparent code, no backdoors, no data collection. Starting from such a purified ground, we go as far as you wish, in order to protect your privacy.
2. [Isolate](#) on your own private VM or dedicated server(s): we build your email server(s) wherever you **trust the most** around the globe. Should you need advice, we'll be happy to recommend top-quality Datacenters. With us, you [know](#) exactly where your data is hosted and replicated.
3. [Encrypt](#) your data both while on storage and while on transfer: we install the SSL Certificates of your selection, as strict as you require.

FIRM CONTROL

Made easy with an advanced [DASHBOARD](#)

Control multiple domains across different locations from one single screen! [Log analytics](#), domain quota [thin provisioning](#) and more powerful functions, all at your fingertips, with neat and beautiful graphs (Bootstrap & CakePHP).

☀ CLEAN INBOX, NO SPAM, NO LOSS

Smart AntiSpam. SPF/DKIM/DMARC authentication

Self-learning Anti-Spam filters all “spam” and “fraudulent” emails from your inbox and places them separately, in your personal JUNK folder. You can access them anytime and easily “drag & drop” those you want back into your inbox. All outgoing emails are always delivered to the recipient’s inbox, as your company’s domain reputation is kept “clean and safe”.

☀ ORGANISED FILING AND SHARING

via IMAP Folder sharing, ACL structure and SIEVE rules

Form the tree-file-structure you want and set automatic filing with Sieve rules. Share only what you want, with the ones you want, giving specific rights: read, write, delete etc. Sharing Corporate Calendars, Contacts and Tasks is practical and time-saving: check availabilities so as to organize a new event or meeting. Define auto-replies, such as “Out-of-office”, for a truly professional correspondence.

☀ SUPPORT

The heart of SophiMail beats here!

Continuous monitoring, maintenance and upgrades is our commitment, so that you always enjoy an enterprise-class Email, as agreed.

Help Desk: Ticketing system and Knowledge base are available 24X7X365. Dedicated Support including on-the-spot visits and telephone IT support are custom-designed upon your specific requirements, so that you get exactly what you need; no more, no less.

☀ COST REDUCTION

SophiMail is free. You pay only for installation and hosting

1. Get the best email server free! No license, no extras required. Effective Anti-Spam and ISP (Intrusion Prevention System) are all built in.
2. No IT investments required: SophiMail fits in your existing IT systems, because it is 100% systems & platforms agnostic. Perfectly syncs with MS Active Directory. You are also free to plan your future IT purchases.
3. Low resources consumption: 1 CPU core and 2 GB RAM for 100 Users!
4. No training required. Connect with any device you prefer, desktop or mobile, and any Email Client you prefer: AppleMail, Outlook, Thunderbird, TELiX etc., older or latest editions.

Trusted solution
for over 200 domains.

Selected deployments:

Compare SophiMail:

Get TOP email features for FREE:

All features listed below are inherent in SophiMail software, thus are available for free in all installations: on-premise or cloud.

User benefits

Auto-filing, tree-structure, tidy inbox

Let SophiMail do the dull work for you! For example, set up the tree-structure you want; then, simply apply Sieve rules, to let your incoming mail get automatically saved in the specified folders!

Selective folder sharing, with access rights

Share only the folders you want, instead of sharing your whole inbox!). Set specific rights per User: some may only read, but others also write, delete etc. This is the professional way to share and collaborate!

Shared Calendars, Contacts and Tasks

Organize your work faster and easier, from scheduling a new event with shared Calendars and Contacts, to delegating tasks. Also, keep your personal calendars and contacts separately.

Self-learning Anti-spam

Well balanced, self-learning anti-spam protects each mailbox. Adopting to each User's preferences, this smart Antispam catches all "suspicious" mails and retains them in the User's personal junk folder, at his discretion. No mail gets lost!

Keep favorite Email Client and device

SophiMail works equally well with all Email Clients: Outlook, AppleMail, Thunderbird, etc. Premium web-mail offers 5 different "Themes" to match your personal style!

IT benefits

Powerful Dashboard **Unique!**

Log analytics, centralized control of multiple domains and locations from one single screen, quota thin provisioning and more powerful features are at your fingertips. SophiMail advanced Dashboard is a unique IT experience!

Full compatibility

Systems- and platforms-agnostic, SophiMail works equally well with all Email Clients, all devices, mobile and desktop, older to latest versions. Syncs with Active Directory. Each User connects with his familiar UI, thus you avoid frustration and training costs.

Daily Backup, Data Portability **Unique!**

Get full control, as if you had a mail-server on premise! Every day, we deliver a server-side copy of your cloud emails, on a location you indicate: on premise (NAS), or on cloud. Delivered in a structured and interoperable format (Maildir), it ensures Data Portability, as per GDPR Art 20 and your Business Continuity. This feature is available upon request; you will be only charged a small fee for initial installation and enjoy it for free ever after.

Archiving and E-Discovery

Your Daily Backup is ideal for Archiving and e-Discovery. Saved in tamper-proof media (e.g. non-rewritable Blu-ray discs), it is ideal for litigation purposes.

PAY ONLY for installation and hosting:

Now, having secured the above TOP features in the software, it is time to decide where you want to install. Installation will allow you to maximize the most critical business factors: Cost Efficiency, Data Privacy, Business Continuity and Uptime.

Let us build

your private email server(s).

You pay one-off for the deployment:
